SYNCRONELITE

SYNCROROWBAR

## CUSTOM ASSEMBLED TWO-PIECE C2P

Over 1,000 different ways to assemble a custom stick that is perfect for your style of play.

The 300-Series, Syncro-Series, BX26 and GS26 combine the best of both worlds; the performance of a one-piece with the value of a two-piece. What do Crosby, Smyth, Thornton, Chara, Marleau, and Spezza have in common? They all use two-piece sticks.

**Versatility.** You can easily switch patterns, finishes, shapes, flexes, and colors in your pursuit of finding "the perfect stick".

**Performance.** A C2P has an equal power rating to a one-piece. 96% of so called "one-piece" sticks are actually made with the same two components used in this tapered connection C2P. The difference is a C2P gives you more diversity and is a more practical choice.

**Construction.** High-modulus carbon fiber construction enhances strength to weight ratio and impact resistance.

**Technology.** Tapered connection maximizes power while minimizing weight. The result is a balanced stick with a quicker release, for a harder and more accurate shot.

RBK® Luongo,  
Dipietro Pro Pattern

Stick Measurement:  
Measure the distance between the two dots for your paddle length.

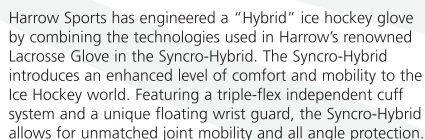

- Three-piece fingers make this the most comfortable and game-ready glove available
- Ergonomic backroll design for natural hand movement
- Rolling cuff creates “touch free” wrist maneuverability. For a more form fitting glove see the Syncro-Hybrid glove.
- Extra Stiff plastic inserts give maximum protection
- The 300 features a new “Twill” material. Twill material is used in 90%+ of NHL gloves because of it's quick-dry, flexibility, and durability characteristics.

## HARROW SUBLIMATED JERSEYS

Sublimated jerseys offer unparalleled customization with unlimited color, font, and logo choices. In sublimation, dye is transferred directly into the thread of the jersey, because of this logos, numbers, and design elements will not crack or peel. No additional materials are added to the jersey such as screen printed ink, embroidery, or tackle twill – this makes the jersey lighter and more flexible.
